Energy Saving Tips

Replace standard incandescent bulbs with CFLs & save 75% off lighting costs. Unplug electronics, battery chargers & other equipment. Taken together, these small items can use as much power as your refrigerator. When possible, wash clothes in cold water, about 90% of the energy used in a washer goes to heating the water. Set your water heater at 120 degrees or "normal". Water heating accounts for about 13% of home energy costs.
